Election/Restrictions

1. Applicant's election with traverse of Group I, claims 1-21 in the reply filed on October 24, 2008, is acknowledged. The traversal is on the ground(s) that claim 1 is not anticipated or obvious over Kasemann et al., and that a search toward all of the pending claims would not pose an undue burden. This is not found persuasive because the inventions, while possibly related, are each independent and distinct. For example, the soluble metal oxide of Group I can be prepared by another and materially different process, such as by admixture of precursor components, followed by precipitation and/or calcination, and the process for the extraction of tin from a mixed tin, antimony, and iron ore of Group VI is unrelated to the soluble metal oxide of Group I, as said soluble metal oxide is not employed in said process.

Although all of the claims may have been examined in the corresponding international application, "with respect to which the subject application represents the national stage", such an examination does not necessitate the examination of all the claims in the subject application.

For these reasons, the requirement is still deemed proper and is therefore made FINAL.

2. Claims 22-49 are hereby withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected metal oxide solution (claims 34 and 36), to a nonelected method for the preparation of a soluble metal oxide (claims 22-33 and 35), to a nonelected metal oxide film and uses thereof (claims 37-42), to a nonelected process for modifying the solubility of a soluble metal oxide (claims 43-47), and to a

nonelected process for the extraction of tin from a mixed tin, antimony, and iron ore (claims 48 and 49), there being no allowable generic or linking claim.

Priority

3. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Applicants' Priority Document was filed on May 19, 2006.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are indefinite because it cannot be determined how a crystallite particle comprising metal and oxygen moieties can have an inner organic binding group attached to at least one metal moiety, and an outer organic binding group attached to at least one inner organic binding group. Such a configuration appears to be sterically impossible.

Additionally, claim 14 is indefinite because the subscript "c" in the formula recited therein has no defined value or range.

Allowable Subject Matter

The indication of allowable subject matter is held in abeyance pending a reply to this Office Action.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
